Fatent No. 5109857
GENERAL INFORMATION:
TITLE OF INVENTION: Mucleotide Sequences Encoding Mammalian Calcium
TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules
FILE REFERENCE: 18617-0052
CURRENT APPLICATION NUMBER: US/09/193,562D
CURRENT APPLICATION NUMBER: US/60/065,922
PRIOR PILING DATE: 1998-11-17
NUMBER OF SEQ ID NOS: 47
SEQ ID NO 28
LENGTH: 914
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         CAAAGTGGTGCCATCATCCACACAGTCGCTTTGGGGCCCTCTGCAGCTCAAGAACTAGAG

Sequence 34, Application US/09193562D

Sequence No. 6309857

GENERAL INFORMATION:

APPLICANT: Pauli, Benedicht U.

TITLE OF INVENTION: Nucleotide Sequences Encoding Mammalian Calcium

TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

FILE REFERENCE: 18617.0052

CURRENT APPLICATION NUMBER: US/09/193,562D

CURRENT FILING DATE: 1998-11-17

PRIOR PILING DATE: 1998-11-17

PRIOR FILING DATE: 1997-11-17

NUMBER OF SEQ ID NOS: 47

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Sequence 1056, Application US/09833263
Patent No. US20020110547A1
GENERAL INFORMATION:
APPLICANT: Clapper, Jonathan D.
APPLICANT: Reagher, Madeleine J.
TITLE OF INVENTION: DIAGNOSIS FOR IMMUNOTHERAPY AND
TITLE OF INVENTION: DIAGNOSIS OF COLON CANCER AND METHODS FOR THEIR USE
FILE REFERENCE: 210121-471C12
CURRENT APPLICATION NUMBER: US(99/833,263
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            GAAATATCCAACTGATGGATCTGAAATTGTGCTGCTGACGGATGGGGAAGACAACACTAT

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Sequence No. 6309857

GENERAL INFORMATION:

APPLICATION:

TITLE OF INVENTION: Mucleotide Sequences Encoding Mammalian Calcium

TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

FILE REFERENCE: 18617.0052

CURRENT PAPLICATION NUMBER: US/09/193,562D

CURRENT FILING DATE: 1998-11-17

PRIOR APPLICATION NUMBER: US/60/065,922

PRIOR FILING DATE: 1998-11-17

NUMBER OF SEQ ID NOS: 47

SEQ ID NO 27

LENGTH: 3007
